

MARK JUDEO LORENZO

WEB DEVELOPER / BACKEND DEVELOPER

 Dasmariñas, Cavite, Philippines
 0921-731-6576
 markjudeolorenzo@gmail.com

PROFESSIONAL SUMMARY

Experienced Web Developer with 8+ years of expertise spanning backend and frontend engineering. Robust proficiency in architectural migration, performance debugging, and high-scale API integrations with third-party networks and financial environments. Well-versed across modern frameworks and legacy optimization with a distinct baseline in data management, automated deployment architectures, and technical execution.

TECHNICAL SKILLS

Backend Development

PHP, Laravel, CodeIgniter, Node.js, REST API Development & System Integration

Database Management

MySQL, PostgreSQL, MS SQL Server, Database Design & Optimization

Frontend Development

JavaScript, jQuery, Vue.js, React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Other Engineering & Operations

Linux Server Config, SEO Management, CRM Utilities, Figma/PSD to HTML, Git, Game Engines (Phaser, Cocos Creator)

PROFESSIONAL EXPERIENCE

Programmer / Web Developer

2016 – 2024

IDNPLAY Corporation

- Maintained, refactored, and optimized core web suites through complex debugging, feature iteration, and query isolation.
- Architected and executed strategic structural migrations of legacy applications from CodeIgniter to Laravel.
- Built, integrated, and scaled secure backend REST APIs connected with international game providers and institutional banking systems.
- Designed, indexed, and normalized high-throughput database schemas for high-traffic game management structures.
- Converted complex design prototypes (Figma, PSD) into responsive, high-fidelity HTML5/CSS3 cross-device applications.
- Managed multi-faceted components of the digital delivery lifecycle, covering server configurations, SEO campaigns, and continuous project code updates via Git version control.
- Ported existing real-time web applications smoothly from Phaser frameworks over to Cocos Creator engines.

KEY PROJECTS

Gudang Kripto – Crypto Wallet Platform

Full Stack Developer

- Engineered and modularized core back-office control layouts utilizing Laravel and Nuxt.js.
- Programmed end-to-end administration panel workflows and core processing API modules handling secure user balances.

KOKO WEBSITE – [Luxury Casino Application](#)

Frontend Developer

- Implemented dynamic, lightning-fast web user interfaces using Laravel blade engines wrapped with robust jQuery architectures.
- Wired core frontend template states into secure endpoints and ensured unified pixel-perfection mapped against Figma rules.
